

AUXILIARY LIGHT

The SEAMOR Marine Auxiliary Light is an easily-installed and positioned independent light source. This compact unit will light up even in the darkest corners of the deep. With a 125 degree beam angle and cool white LEDs it allows objects to be seen just how nature intended. Great for task specific operations or used in conjunction with a vehicle's main lighting system to remove shadows. All standard SEAMOR Marine vehicles come with ports for two Auxiliary Lights. The

same rugged and durable construction that SEAMOR uses in its ROVs has been incorporated in to the Auxiliary Light. The Auxiliary Light is pressure tested and rated to 600 metres. The entire unit is serviceable by SEAMOR Marine or an authorized dealer. A full one-year limited parts warranty is provided, and the various components of the Auxiliary Light can be serviced individually without having to replace the entire product.

BENEFITS

- > High impact sapphire window
- > Low power requirements with wide voltage range
- > Cool white LED lighting
- > Compact & lightweight 120g in air, 65g in water
- > Serviceable by SEAMOR or authorized dealer
- > Easily mounted to ROVs or even dive helmets

DIMENSIONS

- > Diameter: 40mm
- > Length: 50mm (not including connector)
- > Weight in air: 120g
- > Weight in water: 65g

LIGHTING ATTRIBUTES

- > 1000lm on/off control
- > 125 degree beam angle
- > 5500k cool white colour temperature

TARGET INDUSTRY USES

- > Aquaculture
- > Forensics/search & recovery
- > Hydro dam inspection
- > Marine security
- > Pipeline inspection
- > Potable water reservoirs
- > Recreational
- > Marine research
- > Structural analysis
- > Salvage operations

POWER

- > Input Voltage: 24-48 Vdc
- > Power consumption: 10W 48Vdc

OTHER FEATURES

- > Fully serviceable
- > Connector: Marshall 26-5MBRA-1
- > Depth Rating: 600M
