

COMMERCIAL/ MILITARY DIVING & SUBSEA EQUIPMENT

INTRODUCTION

Commercial and military diving operations demand specialized equipment tailored for different underwater tasks, ensuring safety, efficiency, and reliability.

Commercial diving supports a range of industries including Oil and Gas, Marine Construction, Salvage and Underwater Inspections. Commercial divers are highly trained professionals who operate in often harsh and hazardous environments.

SALT's world class range of products and solutions are used by Commercial Divers operating in the Offshore Oil and Gas Industry, Underwater Construction, Salvage Operations, Inland Diving, Underwater Welding and Cutting, Dredging and Debris Removal, Aquaculture and Environmental Monitoring.

Find more about our in-house designed products and the diverse range of manufacturers we partner with, to learn about the full range of cutting-edge technology products and cost-effective services we offer for the Commercial Diving market. Backed by Quality After Sales Support, Experience and Expertise that our technical team brings, we make sure that our customers have the confidence in the quality and reliability of the products and solutions we deliver.

REPAIRS AND MAINTENANCE

Sea and Land Technologies (SALT) offers comprehensive repair and maintenance services for diving equipment. Key services include:

1. Equipment Inspections and Diagnostics

Visual Inspections: Identifying visible wear, damage, or contamination.

Functional Tests: Checking for proper operation of valves, regulators, hoses, and electronics.

Pressure Testing: Assessing the performance of regulators and tanks under high pressure.

2. Regulator Servicing and Calibration

Overhaul of Regulators: Complete disassembly, cleaning, and replacement of internal parts.

Breathing Performance Testing: Ensuring smooth airflow at different depths and pressures.

Calibration and Adjustment: Optimizing regulator performance based on manufacturer specifications.

3. Maintenance of Diving Cylinders and Valves

Hydrostatic Testing: Verifying cylinder integrity under high-pressure conditions.

Valve Servicing: Cleaning, lubricating, and replacing worn-out O-rings or seals.

Interior Cleaning: Removing moisture, rust, or contaminants from cylinder walls.

4. Repair of Full-Face Masks and Rebreathers

Seal Replacement: Repairing damaged silicone or neoprene seals.

Sensor and Scrubber Replacement: Servicing critical components in closed-circuit rebreathers.

Mask Lens and Communication System Repair: Restoring clarity and communication functions.

5. Instrument Servicing and Calibration

Maintenance of Gauges and Depth Sensors: Cleaning and recalibration for accurate readings.

Communication Systems Testing: Verifying the functionality of underwater comms systems.

6. Onsite Repairs and Emergency Support

24/7 Emergency Assistance: Immediate repairs to minimize downtime.

Preventive Maintenance Programs: Tailored service plans to avoid unexpected failures.

With a commitment to safety, quality, and precision, SALT's technicians ensure that all repaired equipment is tested and certified to meet the highest industry standards. Our service offerings aim to extend the lifespan of diving equipment, ensuring reliability for commercial divers, rescue operations, and recreational users.
